**Call For Live Demonstrations**

~~October 26 2025 Demo Description Submission~~

November 02 2025 Demo Description Submission

January 19 2026 Author Notification

February 09 2026 Final Submission

(NOTE: new submission link for the extension period published on ISCAS web-site)

**There will be NO further extensions!!!**

The IEEE ISCAS 2026 Organizing Committee invites proposals for Live Demonstrations to be held during the conference. The live demonstrations will be carried out in presentation booths with ample space to set up a working system, whether it is an interactive software on a laptop, a hardware setup, or a system acquiring signals from a human. Conference attendees are invited to experience the demonstrations directly, to interact with and challenge them. The Committee will recognize one demonstration as the ISCAS Best Live Demonstration Award.

## One-Page Demo Description

Authors are invited to submit a one-page demo description through the online paper submission system, using the same page formatting as for regular ISCAS papers. The one-page demo description needs to be based on either an already published paper as a demo for the first time or a new paper submitted to ISCAS 2026. During submission of the one-page demo description, authors should select "Live Demonstrations" as the Primary Track and an appropriate topical subtrack as the Secondary Track. The one-page demo description must contain the following information:

- Demonstration Title and Reference:** The demonstration title must begin with "Live Demonstration:". If the one-page demo description is based on an already published paper, include at least one reference to your published paper about the scientific background of your live demonstration. The reference must be easily accessible for the reviewers, a URL is highly recommended! If the one page demo description is based on new paper submitted to ISCAS 2026, please include the submission ID of your ISCAS paper in the demo description.
- Demonstration Setup:** Describe the equipment you will bring to ISCAS 2026. Include a photograph and/or screenshot. Only a power plug, a table and display stand will be provided. Demonstrators are responsible for the transportation of their own equipment to the meeting site. Indicate any special requirements such as extra space for demonstrating robotic movement or other requirements which the organizers should be aware of.
- Visitor Experience:** Explain the way in which a visitor experiences and interacts with your demonstration, how it reveals the essence of your work, furthers understanding, and what the visitor will learn.
- Optional Video:** For the initial submission only, authors can also include an optional link to a video (max 5min) about their demo. This video is only meant to facilitate the review process, and **does not substitute for the live demo!**

**Strict no-show policy:** Any accepted live demonstration is required to be presented as such at the conference. No-shows will not result in an IEEE Xplore publication
